

## Informationen zu den Vorträgen

---

<b>Referent</b>	Steven Peck
<b>Vortragstitel</b>	Biophilia, Design and the Bottom Line: How Biophilic Research is Shaping Green Infrastructure and Improving Return on Investment
<b>Themenblock</b>	20.06.2017 Übersicht Fallstudien aus Nord-Amerika
<b>Vortragssprache</b>	English
<b>Inhalt</b>	Insights from biophilic research related to the human body and economic impacts are providing new insights in how to design environments that contribute to better health and economic outcomes. This presentation will highlight some of these key insights and give case study examples from North American projects.
